

*Your helping hand in clinical trials*

## ***Are you struggling to find information how to set up a clinical study in Belgium and/or The Netherlands?***

### ***Discover and join our training courses !***

*Despite all efforts for harmonization, setting up a clinical study in Europe remains a challenge. Finding information on the local requirements for regulatory submissions, is scattered and unpractical.*

*To help you overcome this hurdle, we want to share our years of experience in starting up clinical studies and organize the following theoretical and practical training sessions :*

-  ***Regulatory submissions of clinical trials with a medicinal product in Belgium***
-  ***Regulatory submissions of clinical investigations with devices in Belgium***
-  ***Regulatory submissions of clinical trials with a medicinal product in The Netherlands***
-  ***Regulatory submissions of clinical investigations with devices in The Netherlands***

*The courses guide you through the jumble of local requirements for regulatory submissions to obtain green light to start a study . The courses are illustrated with practical examples and most updated information is guaranteed.*

- ***Web-based training sessions or Face to Face meetings:***

*AML organizes interactive training via web access. Session dates are published on the AML website [www.aml-research.be](http://www.aml-research.be)*

*AML also provides F2F training for companies and institutions on request. Training can be adapted to specific group needs and can be hosted in-company or at AML premises.*

***For more detailed information, visit our website or contact us at [training@aml-research.be](mailto:training@aml-research.be) or +32 (0)16 78 21 70.***
