

The background of the slide features a complex 3D molecular model. It consists of several interconnected clusters of atoms, represented by small spheres in various colors (red, white, purple, green, blue). These atoms are surrounded by translucent, multi-colored isosurfaces in shades of blue, purple, and pink, which likely represent electron density or a specific chemical environment. The overall aesthetic is scientific and high-tech, set against a dark blue gradient background.

Facilitating your research

Facilitating your research

By Your Side™ In Life Research: our slogan tells you what Nordic BioSite is all about. It defines our way of thinking and working. We stand by your side in your research. We find the right products in order to help you reach your goals. *We are by your side.*

Nordic BioSite is recognized as a leader in the supply of products for medical research and diagnostics. We are your local supplier in the Nordic and Baltic regions.

20 successful years in the business have given us valuable experience that benefits you as a client.

More than a job

The pride of Nordic BioSite is more than our impressive product range. It is more than our 20 years in the business. Our number one asset is our people. All members of our sales force have experience

in laboratory work, with educational backgrounds ranging from Master of Science to Ph.D. This gives them a unique understanding for our clients' needs and the ability to offer qualified, relevant help. Information and knowledge is commonly shared within the company and helps quality and improvement.

You will benefit from our enthusiasm and competence while we guide you through the jungle of products. We find the product that is right for your research – at the best possible price.

This is more than a job. We want to help you fight diseases and find cures. We are your helping hand.

A broad product range

Nordic BioSite is an established growing company, representing top quality manufacturers of validated products for research and diagnostics. This includes areas such as for example neuroscience, stem cell and cancer research.

Our product range contains more than 100,000 products. The products are used in a vast range of research areas including Alzheimer's, cancer, diabetes and other serious diseases. We represent the best manufacturers in the USA, Asia and Europe. Quality and a broad product range are important factors in our choice of manufacturers.

Communication is the key

Communication is an important tool in our quest to improve. We want to know what you think. The feedback from our clients is used to improve Nordic BioSite's product range and services, as well as our partners' research and manufacturing. As a result of your feedback, we can continuously introduce new products that are on the cutting edge.

We want to facilitate your research

This is what you can expect from Nordic BioSite: a reliable, knowledgeable and trustworthy supplier who guides you to the right products for your research. We constantly strive to be a better partner in your research.

THIS IS WHAT YOU GET

- Qualified help from experienced sales force
- Access to broad product range
- A reliable and trustworthy supplier
- New products on the cutting edge
- Enthusiasm and commitment

MAJOR RESEARCH AREAS

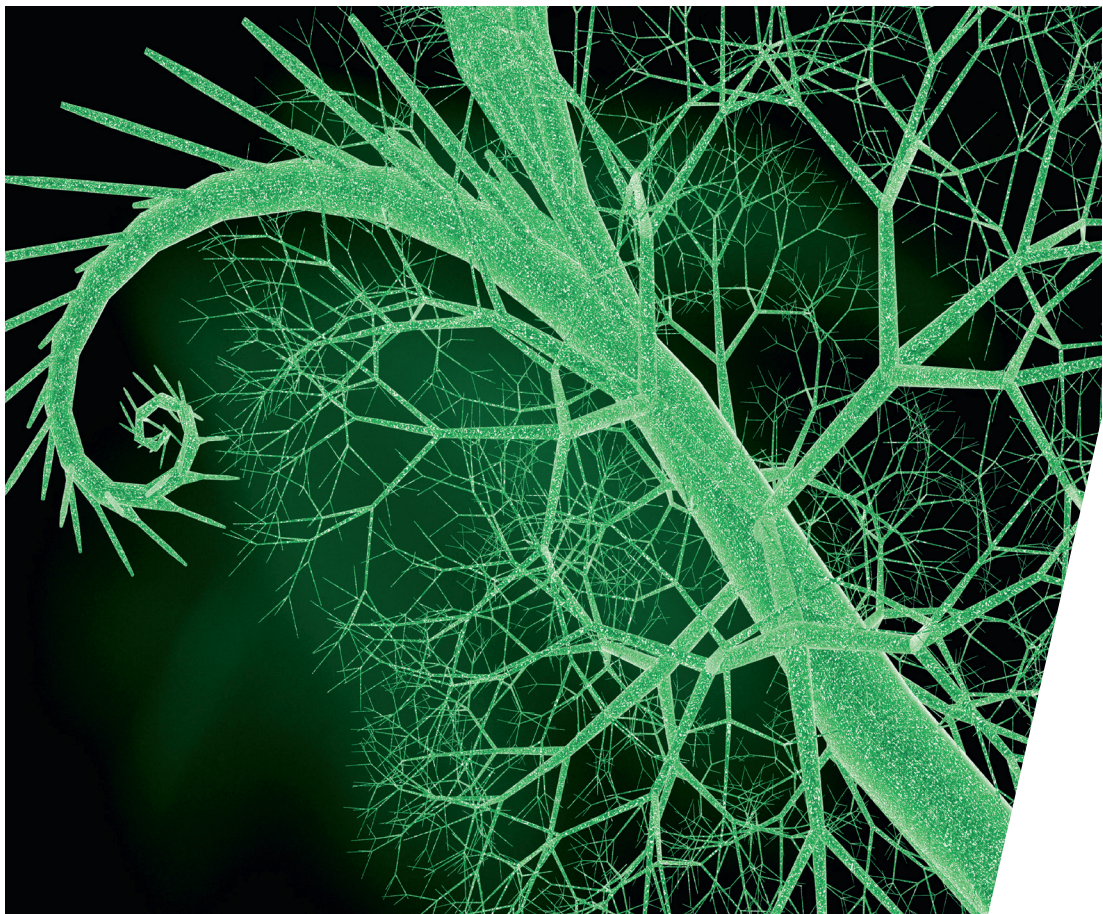

- Stem cell research
- Cancer research
- Neuroscience
- Cytokines
- Cell surface
- Cell signaling

IMPORTANT METHODS

- Flow cytometry
- Immunohistochemistry
- Western blot
- ELISA
- Multiplex
- CISH (Chromogen In Situ Hybridization)
- FISH (Fluorescence In Situ Hybridization)
- PCR

PRODUCT TYPES

- Antibodies
- Proteins
- Peptides
- Kits
