

NeoTOP 1604

ALWAYS ADAPTING TO YOUR REQUIREMENTS.

COMPLIANCE IN PACKAGING DESIGN

NeoTOP 1604
Modular and extendable packaging system, so you're not stuck on one implementation; enabling flexible and efficient production.

	range of formats l x w x h in mm	max. no. of partitions	output packs/min
NeoTOP 1604		4	160
minimum	60 x 35 x 17		
maximum optional	200 x 170 x 60*	at 1/2 output	

* max. depending on box footprint

- Patient**
- clear product overview thanks to top opening
 - patient guidance
 - products and leaflets are easily accessible
 - easily re-closable

- Production**
- lower total cost of package TCP
 - safe process (100% verification after loading)
 - lower total cost of ownership TCO
 - flexible platform
 - quick format change over

- Logistics**
- flat mono-material (cardboard) blanks (inbound)
 - compact dimensions (outbound)
 - product protection
 - late stage customization

- Marketing**
- flat cardboard blanks printable on both sides
 - brand recognition
 - sustainability (no plastic)

- Regulatory**
- tamper evident closing
 - security options
 - T & T

SPEED UP
mid-size and large lot production
up to 16 mio packs per year

1 CARTON ERECTING MODULE

The magazines for the flat blanks - partitions and carton - are positioned for high visibility and are accessed from outside. They can be filled during operation. The flat blanks are erected and glued into cartons and placed on a vacuum conveyor. The correct shape of the pack is checked and defective packs are ejected. Carton erection and partition forming are active, servomotor driven processes.

2 PRODUCT INSERTION MODULE

Products are laid in automatically. Dividella offers a wide range of product feeders that ensure gentle handling and safe loading of the product. Thanks to the modularity, feeders can be retrofitted at a later stage on site. **Format changes** are performed quickly, easily and using no tools. The change parts are pinned. No fine adjustment is required after a format change.

3 CARTON CLOSING MODULE

Other infeeding functions such as leaflet or booklet insertion can be accomplished on this module as well. Conform to Directive 2011/62/EU cartons can be closed in various ways, using hotmelt, fugitive glue or labels, with or without tamper-evidence – see above examples – and finally, packs which have not been confirmed as correct at all stations are ejected.
