

We've seen things you people...

Bonfiglioli Engineering is a story that starts from afar.

A story that starts from an idea, from the belief that for every problem it is possible to find a solution. For more than 40 years **Bonfiglioli Engineering** has been designing solutions for all those work areas where **control** and **integrity** are at the core of **productivity**.

Quality Control Solution

Innovation

Bonfiglioli Engineering is the story of all those companies that won't dwell on what's "already been done" but instead go further down the path of innovation, knowing that only by envisioning tomorrow with today's necessities we can evolve and improve.

Technology

Bonfiglioli Engineering is a story of evolving technological applications made to support the perfect machine: The human being! We pursue a technology that does not supersede man, but instead exalts it. That can make him more efficient because behind every great project there is a great team.

Sail

There are times when one idea becomes a game changer, moving forward the concept of perfection.

SAIL is that idea. And now SAIL is reality.

Efficiency

More control, more support, more assessment tools. **SAIL** will become your favorite colleague, the one to ask for advice, the one that solves the problems, that who listens and helps you.

The ultimate link between man and technology.

Serenity

Imagine a world where solutions suddenly appear clearer; a world with no room for stress. **SAIL** is the tool able to generate the evolutionary jump that will shape a new world.
