

UNLOCK PICHIA
a technology from VALIDOGEN

Pichia pastoris Protein Expression Excellence

VALIDOGEN TRACK RECORD

Contract Research Projects

- Serving customers for more than 10 years
- Customers from different industry sectors
- Projects with industry giants as well as start-up companies from all continents

Licenses & Tech Transfer

- Commercial licenses granted to licensees from different industry sectors
- Successful technology transfers – Scale-up to several 1000 l (50k max)
- Clinical study material from VALIDOGEN *P. pastoris* in Phase I

Advanced Technology Platform

- **UNLOCK PICHIA** - Proprietary *Pichia pastoris* protein expression toolbox
- Proven and globally recognized cutting-edge technology platform
- Unmatched in terms of yield, development timelines, quality & safety

Team & Facilities

- Highly skilled and experienced team
- Strong background in protein production and optimized workflows
- State of the art laboratory infrastructure and production equipment

Intellectual Property

- Key patents protecting technological leadership position
- Firm IP position, several patent families
- Freedom to operate

Development & Collaborations

- Non-exclusive technology development with Boehringer Ingelheim
- Several academic collaborations
- Several B2B collaborations
