

NATURAL NASAL SPRAYS

ARE IN DEMAND BY TODAY'S CONSUMER

Today's consumers are more aware of the risks of overusing nasal decongestants, leading them to seek natural solutions. An alternative, effective option are saline or seawater nasal sprays.

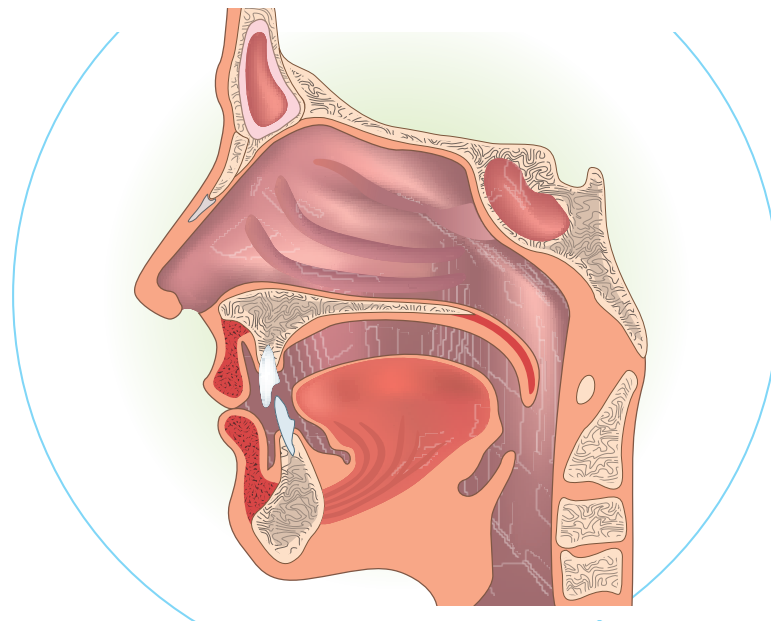

WHY SEAWATER?

Seawater is rich in salts and minerals -- elements that our bodies already require. Aurena sources the purest seawater from Sweden, filtered to produce a preservative-free aseptic seawater solution.

HOW IT WORKS

Gentle spray thins the mucus in the nasal cavity.

The acidic environment is normalised by the natural solution.

Alleviates symptoms of acute and chronic rhinosinusitis, upper respiratory tract infections.

Excess mucus, crusts, dust, pollutants and allergens are mechanically washed away.

BENEFITS

OF SALINE OR SEAWATER NASAL SPRAY IN BAG-ON-VALVE SPRAY

- ✓ Non-habit forming
