

Expert in assembly
and automation process

LAGNIEL SAS

The variable satellite pitch (SPV)

- It allows a continuous introduction of the components and eliminates impacts between the products.

The cardioïde : dual variable satellite pitch

- It facilitates the transfer of components from an assembly device towards another one for more flexibility (link two dials or transfer plates with different pitches).
- It allows to perform test, gluing, siliconizing operations etc

High-Speed Packaging

- High-speed packaging solutions equipped with robots. Storage containers management
- Standard or customized.
- Autonomous or integrated.
- Speed up to 1000 ppm.

Hoppers for the pharmaceutical industry.

- No components retention zone.
- Quick emptying system
- Easy cleaning access.
