

Development

our service for your product

ARTES is a **well-established** R&D partner for the pharmaceutical industry. Our technology and know-how is secured by **own IP, exclusive licenses** and **trade secrets**.

Our cell line development is based on efficient **high-yield microbial** expression platforms.

Several recombinant products derived from our platforms are **marketed worldwide** by our clients.

www.artes-biotechnology.com

ARTES offers proprietary **microbial** solutions for **stable, cost efficient** and **fast** product development and manufacturing.

ARTES´ offer includes the delivery of

- ✦ cell lines
- ✦ production processes
- ✦ analytics
- ✦ preclinical material
- ✦ GMP batches
- ✦ process transfer

Yeast platform *Hansenula* (*Pichia*)

Competitive advantages:

- ✦ methanol free
- ✦ 100 % stable cell line
- ✦ low cost manufacturing
- ✦ short fermentation
- ✦ no allergens
- ✦ antibiotic free platform
- ✦ proprietary secretion enhancement

Our team has more than 20 years' experience of **commercial project management** in contract research and provides **tailor-made** recombinant production processes.

We are experts in **gene expression trouble-shooting** and in set-up of manufacturing processes.

We are the dedicated partner for your innovative target!
