

DecFill® RW-400
Rotary Washing Machine

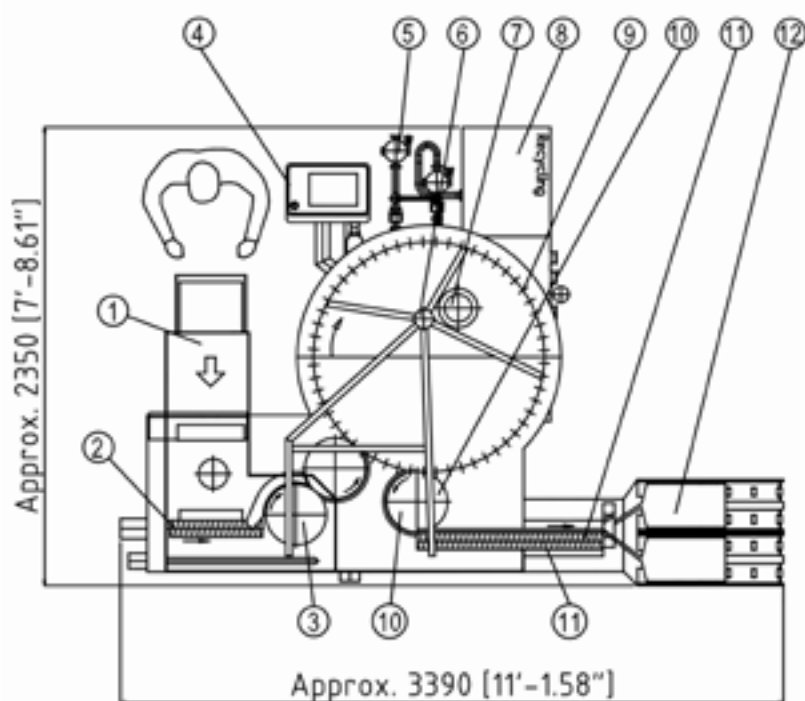

DecFill® RW-400 Rotary Washing Machine

Rotary washing machine for bottles, vials, cartridges, ampoules and other containers

DecFill® RW-400 machine is designed to clean containers externally (up to 2 stations) and internally (up to 6 stations). Containers are loaded by trays on to a stainless steel wire mesh conveyor belt and fed into the transport system. Automatic lift guarding hood covers the cleaning area for a safe and contained process. Containers are discharged into scroll to a downstream machine or tray loader.

Technical Data	DecFill® RW-400
Output	up to 400 containers/min
Electrical Supply	400V, 50/60Hz

- ① Infeed Belt
