

# EnviCheck water treatment products

EFFICIENT, SAFE, LEGALLY COMPLIANT

Optimising treatment plants for  
wastewater and process water.

Our industry and technology experts assess your existing plant technology and the water treatment products used.

## EnviCheck

Deviations in production or changes made to regulatory limit values necessitate adjustments to wastewater and process water treatment. As a result, it is worth analysing the water treatment process.

### EnviCheck – scope of services

#### Analysis and evaluation of the current process and the technical conditions

Ensuring compliance with limit values

Managing sludge, improving dewatering, reducing quantities

Concept for fluctuating wastewater streams

Minimising handling of hazardous substances

Efficient flocculation and precipitation

#### Joint development of treatment proposals by our experts

Conserve resources and cut operating costs with our bespoke treatment concepts.
